

FAN-APART ADHESIVE

Fan-Apart Adhesive from Pixelle Specialty Solutions® is specifically formulated for use with carbonless sheets and rolls to create multi-part forms. This adhesive simplifies carbonless jobs by adhering trimmed sheets together, so they easily fan apart into ready-to-use sets.

-
- > Formulated to work with all ExcelOne® and Xcelerator® carbonless sheets
 - > All Xcelerator rolls and select Trans/rite® rolls are edge-paddable
 - > Absorbs evenly and sets in as little as 30 minutes

COMPATIBLE PRODUCTS

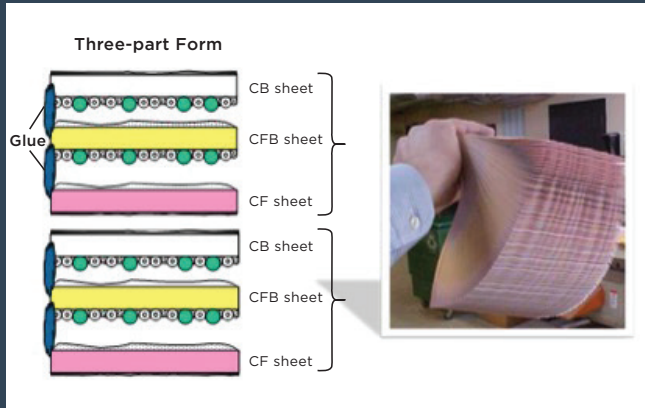

Fan-Apart Adhesive works with all ExcelOne® and Xcelerator® carbonless sheets and with all Xcelerator rolls. Most of the Trans/rite® roll offering can be ordered for edge-pad use. Those listed in the table are already designed to work with Fan-Apart Adhesive. If you need a Trans/rite product not listed, please call your sales or customer service representative.

Compatible Rolls

TRANS/RITE CB EP	TRANS/RITE CF EP	XCELERATOR
16 lb.	15 lb.	CB 22 lb.
21 lb.	21 lb.	CFB 22 lb.
		CF 21 lb.

HOW FAN-APART WORKS

Fan-Apart Adhesive is attracted to absorptive materials in coatings applied to compatible carbonless products during manufacturing. It's also repelled by an additional treatment applied to areas the adhesive shouldn't go, like the front side of the top sheet. The result is a form set that holds plies in place until it's time to separate the sheets.
