

FC-FREE PAPER

FlexArmor
FC-FREE

FLUOROCARBON-FREE FOR MORE SUSTAINABLE PAPERS.

FlexArmor™ barrier technology from Pixelle® delivers reliable oil and grease resistance for an extensive range of food service applications without the use of fluorocarbons (FC), also known as polyfluoroalkyl substances (PFAS). This innovative, FC-free barrier technology provides a more sustainable alternative to conventional oil- and grease-resistant (OGR) papers while maintaining a comparable level of performance. FlexArmor is available with a broad range of basis weights and performance characteristics and is supported by a dedicated team of experts who can tailor a custom solution and facilitate your transition to FC-free products.

THE SUSTAINABLE ALTERNATIVE

- ✓ Available in basis weights ranging from 15 lb. to 150 lb.
- ✓ Available in bleached or natural kraft
- ✓ Available with wet strength
- ✓ FDA-compliant for direct and indirect food contact
- ✓ Functional one-side (F1S) and functional two-side (F2S) options available
- ✓ Formulated for a variety of food service applications
- ✓ FC-free options also available for non-food-related applications

STAND TUBS**

MAKING SUSTAINABILITY PART OF THE PACKAGE

Paper packaging provides a balance of strength and printability using one of the most renewable substrates on the planet. Our industry is the biggest tree planter in America, and our partners, America's tree farmers, are the reason why the net volume of trees on American forestland has grown substantially. Our flexible packaging papers enhance brand appeal on the shelf while protecting the environment through recycling options that are important to consumers.

PXL-31610-111220

All grades are available as chain-of-custody certified under these forestry certification programs. Call Customer Service for more details on certified products.
